INDUSTRY LEADING TECHNOLOGY

Maximizing operator efficiency is the vision behind the future of Elmer's technology. Haulmaster **PRO** and **CONNECT** systems helps the operator make better decisions with quick actions to get them back to the combine as soon as possible.

What is **CONNECT** & **PRO**...

CONNECT

Haulmaster **CONNECT** was developed to be a simplified, grain cart-focused hub and brain of all electronic features. It features a Controller on the cart that connects the Scales, GPS and Haulmaster **PRO** to the operator using the supplied tablet.

FEATURES:

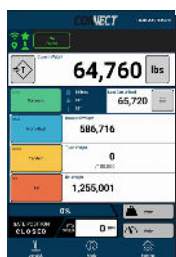

- Data stored on tablet and controller.
- Direct scale connection.
- Detailed load tracking (*Crop, Field, Truck, Bin*).
- No battery required.
- GPS load tagging.
- Multiple devices support (*Cart, Truck, Combine*).
- Export load data to email or Excel.
- Includes tablet, window mount and charger for turn key solution.
- John Deere integration.
- Clear-able tare.

PRO

Haulmaster **PRO** was developed with the vision of allowing the operator to maximize their unload experience without over-complicating the design. The more efficient the operator is at unloading, the quicker they can get to the next combine.

FEATURES:

- Industry leading auger fold/ unfold speed.
- Hydraulic output limit reduces the duty cycle to specific hydraulics lines.
- Double tap to fold/ unfold auger.
- Joystick with proportional spout control.
- 4-way spout axis movement.
- Auto spout return to center on auger fold.
- Auto gate close at speed.
- Auto gate close at truck weight.
- One hydraulic input and 7 pin plug power.
- Enhanced troubleshooting.
- Includes Haulmaster **CONNECT**.
